

Northwind: logistics software that cuts delivery cost

Seed round · Investor presentation

THE PROBLEM

23%

of delivery spend is wasted on empty miles and failed first attempts

- Small carriers plan routes by hand
- Customers get vague delivery windows
- No tool fits a fleet under 200 vehicles

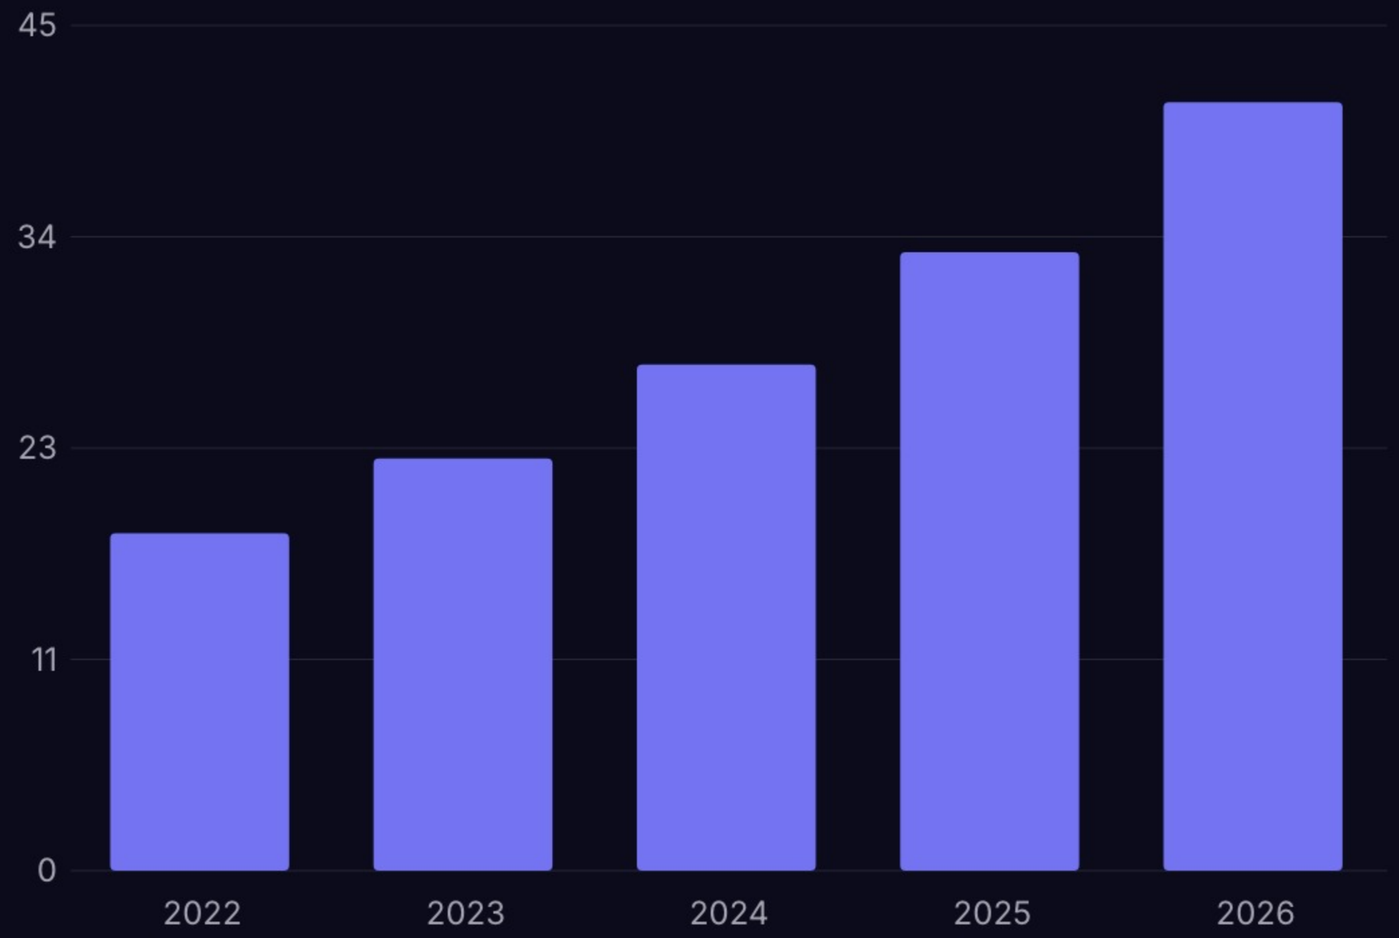

Our solution

- Automatic route planning in under a minute
- Live delivery windows customers can trust
- Works with the vans and phones fleets already have

A market that is growing fast

Last-mile software is on track to more than double in five years.

How it works

Import

Upload the day’s orders or sync your system

Plan

Routes are optimised for time, cost and capacity

Deliver

Drivers follow turn-by-turn routes in the app

Notify

Customers get live windows and proof of delivery

Traction so far

84

Paying fleets

Up from 12 a year ago

$610K

Annual recurring revenue

17%

Month-on-month growth

98%

Customer retention

Why we win

Typical tools

- Built for enterprise fleets
- Months of onboarding
- Per-vehicle pricing that punishes growth

Northwind

- Built for fleets of 5 to 200
- Live in a single afternoon
- Simple flat pricing

Use of funds and milestones

Q1	Q2	Q3	Q4
Product	**Go to market**	**Scale**	**Profit path**
• Driver app 2.0 • Open API	• Sales team of 4 • Channel partners	• New regions • Enterprise tier	• Break-even routes • Series A readiness

The team

PN

Priya Nair

CEO

Ran operations for a 300-van courier network

DO

Daniel Okafor

CTO

Built routing engines at a global logistics firm

MT

Mei Tanaka

Head of Growth

Scaled two B2B SaaS products to $10M

The ask

18 months of runway

Led by [lead investor], with room for a few angels

Seed round to reach 300 fleets and break-even routes

$2.5M
